yahyaelsawi.website

Product and UX designer with a BSc in Computing and Information Technologies and production experience in frontend development. Connects user needs and business goals to clear flows and practical interfaces, with technical grounding to collaborate closely with engineering.

Experience

Business Development Associate Intern · Credo Technology Services — September 2026–Present

Research accounts, identify stakeholders, qualify needs, and support outreach and discovery for Microsoft licensing and Professional Services opportunities. Connect relevant prospects with technical specialists; no sales totals or consulting delivery are claimed.

Cybersecurity Intern · StarLink, an Infinigate Group Company — July–August 2026

Completed isolated virtual lab training in firewall policy, NAT, identity, LDAP/LDAPS, remote access, network traffic analysis, and troubleshooting. No production deployments or confidential work samples are claimed.

Frontend Developer & Product Associate · Gift It — May 2024–Present

Build and maintain responsive web experiences; prototype UX improvements and test user journeys; develop transactional email templates; and contribute to product, localization, and positioning work.

Selected projects

Giftit App Positioning & Product Growth — Product positioning, store content, and UX contribution for a published gifting app. — June 2026

SmartMall AI Network Automation — Equal contribution to a five-person academic proof of concept for network operations, validation, and recovery. — May 2026

RIT Student App 2.0 — Student interviews, information architecture, flows, and interface design for an academic product concept. — September–December 2023

Education

BSc in Computing and Information Technologies · Rochester Institute of Technology, Dubai
Minor in Business Administration · Awarded May 2026
