

Roadmap & Sitemap.

A complete guide to every functional route, how visitors navigate between pages, and how local, public, locked, and owner-only access differ.

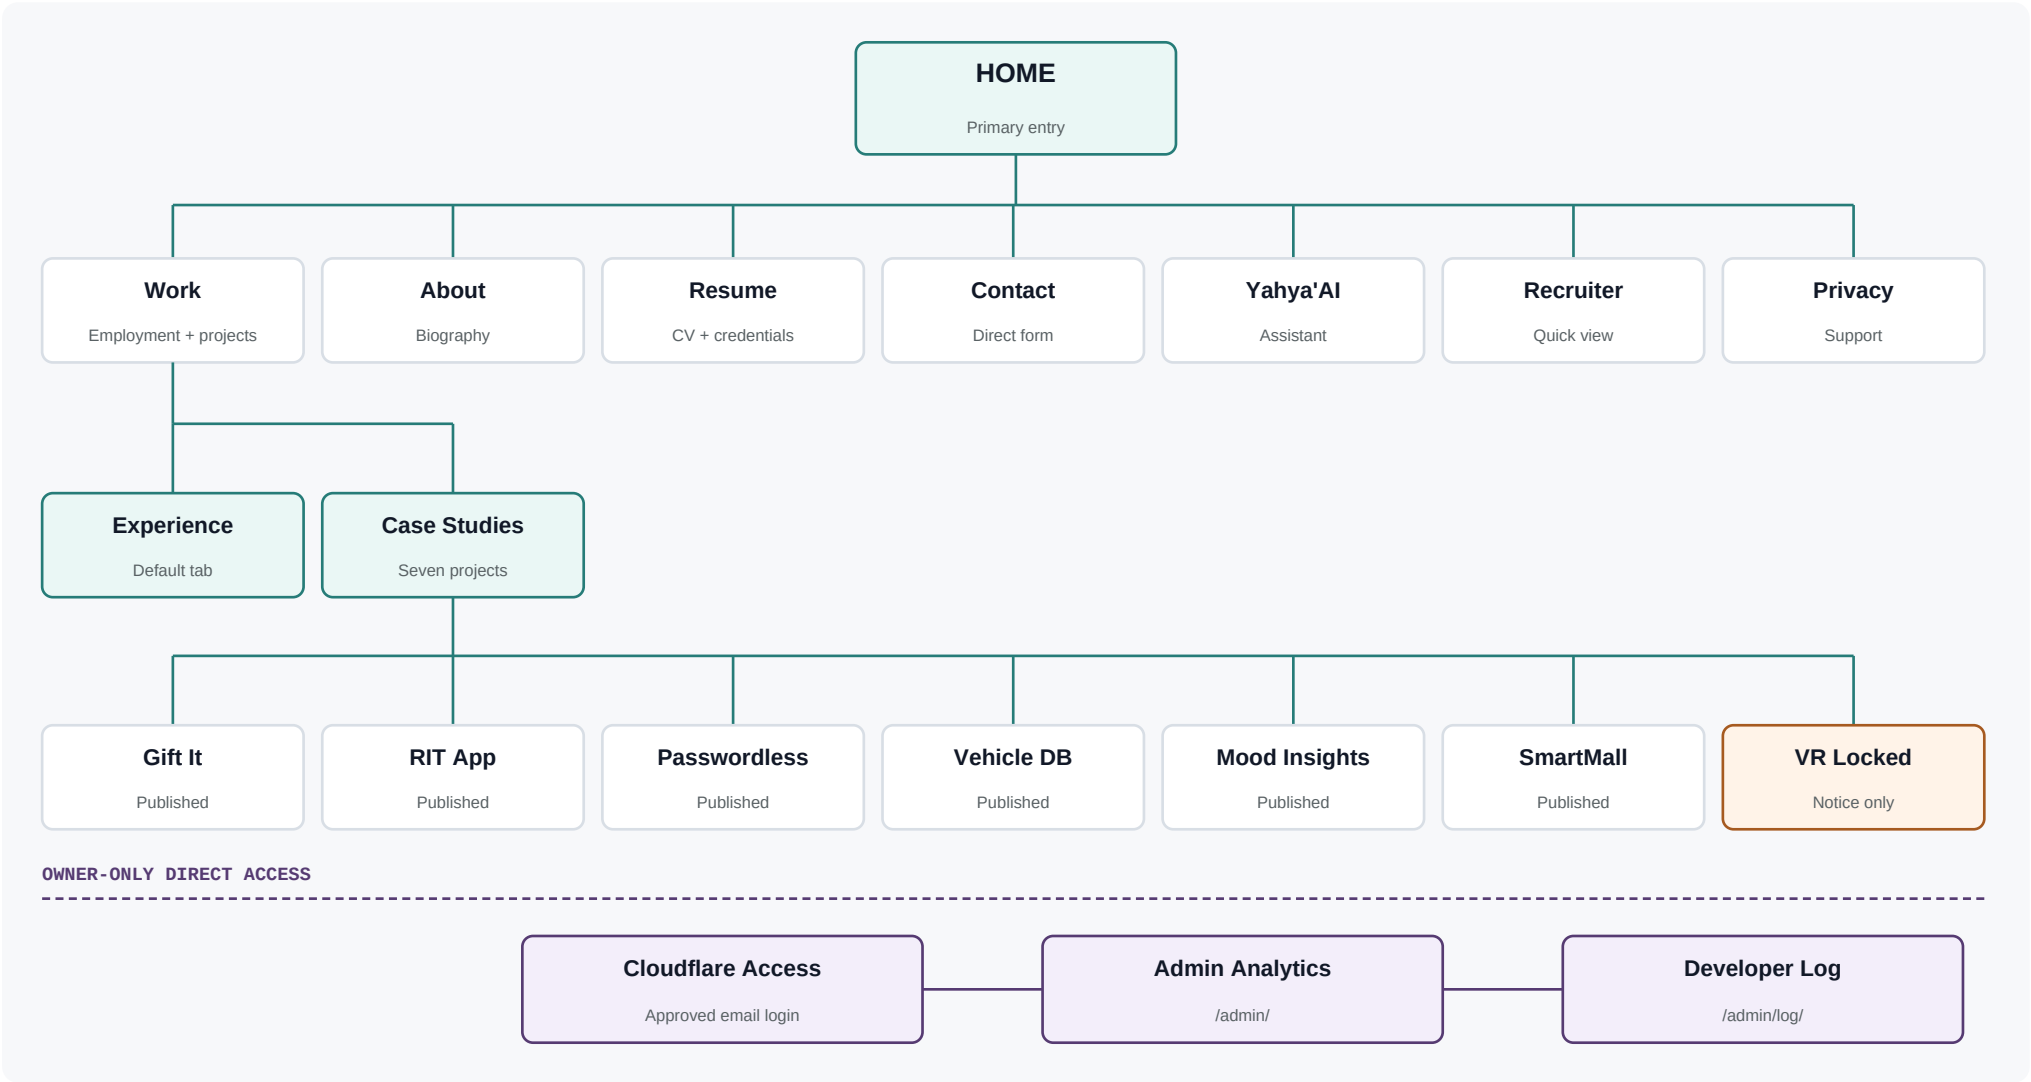

FUNCTIONAL ROUTES 17 15 public + 2 owner-only	PUBLIC ROUTES 15 Includes the locked VR notice	OWNER-ONLY 2 Protected by Cloudflare Access	SYSTEM PAGE 1 404 fallback, outside navigation
--	---	--	---

LOCAL DEVELOPMENT	PRODUCTION
Base URL: http://127.0.0.1:4173 All pages are available for QA. Cloudflare Access does not run locally, and live APIs require local bindings.	Base URL: https://yahya-elsawi-portfolio-bnj.pages.dev Public pages are open. Admin routes require the approved Cloudflare Access identity.

Reading rule: solid teal paths are normal public navigation. The amber node is a public locked notice. The purple path is direct owner access and does not appear in public navigation.

How the website connects.

Start from Home for the public journey. Work separates verified employment from case-study evidence; admin is intentionally outside the public tree.

Every visitor-facing page.

Use the navigation path for normal discovery or either link column for direct access. Project order follows the website's newest-first sorting rules.

Core pages

PAGE	ROUTE	HOW TO REACH IT	ACCESS	LOCAL	PRODUCTION
Home	/	Starting point and primary navigation	Direct entry	Open local	Open production
Work	/work/	Header: Work	Professional Experience opens first	Open local	Open production
About	/about/	Header: About	Public	Open local	Open production
Recruiter Quick View	/recruiter/	Home or Work recruiter action	Public	Open local	Open production
Resume	/resume/	Header: Resume	PDF opens first	Open local	Open production
Contact	/contact/	Header: Contact	Public form	Open local	Open production
Yahya'AI Terminal	/terminal/	Header: Terminal	Live AI or labeled fallback	Open local	Open production
Privacy	/privacy/	Footer and privacy notices	Public support page	Open local	Open production

Project pages

PAGE	ROUTE	HOW TO REACH IT	ACCESS	LOCAL	PRODUCTION
VR Neuroanatomy	/work/vr-neuroanatomy/	Work > Case Studies > Locked	Notice public; content withheld	Open local	Open production
SmartMall Network Automation	/work/network-automation/	Work > Case Studies	Published	Open local	Open production
Mood Insights	/work/mood-insights/	Work > Case Studies	Published	Open local	Open production
RIT Student App	/work/rit-app/	Work > Case Studies	Published	Open local	Open production
Gift It	/work/gift-it/	Work > Case Studies	Published	Open local	Open production
Passwordless Redesign	/work/passwordless/	Work > Case Studies	Published	Open local	Open production
Vehicle Rental Database	/work/vehicle-rental/	Work > Case Studies	Published	Open local	Open production

Private, locked, and compatibility paths.

These destinations are deliberately handled differently from normal public pages. Local access is for QA; production access follows the controls below.

Owner-only routes

OWNER ONLY Admin Analytics /admin/ Direct URL only Owner only - Cloudflare Access Open local Open production	OWNER ONLY Private Developer Log /admin/log/ Admin > Developer Log Owner only - Cloudflare Access Open local Open production
--	---

LOCKED PROJECT	PRIVATE ADMIN	SYSTEM PAGE
VR Neuroanatomy is publicly reachable through Work, but only the ongoing-research notice is shown. The project content remains inaccessible.	Open /admin/ in production, complete Cloudflare Access with the approved owner email, then open the analytics dashboard or private developer log.	The 404 page appears automatically for an invalid route. It is public infrastructure, but it is not part of the normal site navigation.

Compatibility redirects

Legacy project URLs redirect to /work/project-name. /experience redirects to /work. /log and /log.html redirect to /admin/log/ and remain behind Cloudflare Access. Redirects preserve old bookmarks but are not counted as additional pages.

Fast access checklist

Public visitor: Home -> Work -> choose Professional Experience or Case Studies -> open a project. Recruiter: Home or Work -> Recruiter Quick View -> CV, evidence, contact, or Yahya'Al. Owner: direct /admin/ -> Cloudflare Access -> analytics -> private developer log.
